HRMS package – typical features

Core Functionalities of the Onboarding Module

1. **Pre-boarding Setup**
    - Digital offer letters and contract signing.
    - Collecting personal details, documents, and compliance forms.
    - Provisioning IT accounts, email IDs, and access credentials.
2. **Orientation & Training**
    - Scheduling induction programs and orientation sessions.
    - Assigning mandatory training modules (e.g., compliance, safety).
    - Providing access to company policies and handbooks.
3. **Task & Workflow Automation**
    - Automated checklists for HR, IT, and managers.
    - Role-based task assignments (e.g., equipment allocation, ID card issuance).
    - Progress tracking for onboarding completion.
4. **Integration with Other Systems**
    - Sync with payroll, attendance, and performance management.
    - Linking employee data to benefits and insurance providers.
5. **Employee Experience**
    - Self-service portals for new hires.
    - Welcome messages, team introductions, and buddy programs.
    - Feedback collection on onboarding experience.

Core Functionalities of the Offboarding Module

1. **Exit Formalities**
    - Automated resignation/termination workflows.
    - Clearance processes (finance, IT assets, access rights).
    - Final settlement calculation (salary, benefits, reimbursements).
2. **Knowledge Transfer**
    - Structured handover of projects and responsibilities.

    - Documentation of ongoing tasks for successors.
3. **Compliance & Documentation**
    - Exit interviews and feedback collection.
    - Generating relieving letters, experience certificates, and compliance reports.
4. **Access & Security Management**
    - Revoking system access, email accounts, and ID cards.
    - Ensuring return of company property (laptops, badges, etc.).
5. **Analytics & Reporting**
    - Tracking attrition trends and reasons for exit.
    - Generating HR insights for workforce planning.

Attrition Analysis

An attrition analysis module in a Human Resource Management System (HRMS) provides data-driven insights into why employees leave and identifies patterns to help improve retention.

The primary functionalities include:

1. Attrition Metric Calculation

Real-time Rate Tracking: Automatically calculates monthly, quarterly, and annual attrition rates using standard formulas (e.g., number of leavers divided by average headcount).

Segmentation: "Slices and dices" data to show attrition by department, job role, location, gender, age group, and tenure.

Benchmarking: Compares internal attrition rates against industry standards to determine if the turnover is healthy or alarming.

2. Predictive Analytics & Risk Assessment

Flight Risk Scoring: Uses machine learning and historical data to identify current employees at high risk of leaving ("flight risks").

Early Warning Indicators: Flags patterns such as declining performance, increased absenteeism, or lack of recent promotions that often precede a resignation.

Stay/Exit Correlation: Analyzes past engagement survey scores of departed employees to find leading indicators of turnover.

3. Root Cause & Sentiment Analysis

Exit Interview Management: Digitizes and standardizes exit interviews to capture qualitative reasons for departure (e.g., toxic culture, poor management, or better pay).

Sentiment Analysis: Uses AI to process feedback from surveys and communications to detect broader shifts in employee morale or satisfaction.

Correlation Reporting: Links attrition to specific factors like pay gaps, commute distance, or years since the last promotion.

4. Retention & Strategic Planning

Intervention Alerts: Sends automated notifications to managers when a high-value team member is flagged as a retention risk.

Scenario Modeling: Simulates the financial impact of potential departures, including recruitment and lost productivity costs.

Succession Planning Integration: Identifies critical roles at risk of being vacated (e.g., due to retirement) and triggers the development of internal talent pipelines.

5. Visual Dashboards & Reporting

Heat Maps: Visualizes turnover "hotspots" across the organization to pinpoint specific troubled teams or managers.

Batch/Cohort Analysis: Tracks the "survival rate" of specific hiring groups (e.g., the 2024 graduate intake) to evaluate onboarding effectiveness.

Benefits administration

Core Functionalities of the Benefits Administration Module

1. **Benefits Enrollment & Management**
   - Allows employees to **enroll, modify, or opt-out** of benefits (health insurance, retirement plans, wellness programs).
   - Provides **self-service portals** for employees to manage their benefits.
   - Supports **open enrollment periods** with automated workflows.
2. **Plan Configuration & Customization**
   - HR can configure multiple benefit plans (medical, dental, vision, pension, etc.).
   - Supports **eligibility rules** based on employee type, grade, or location.
   - Enables customization of contribution levels (employer vs employee).

3. **Integration with Payroll & Finance**
   - Automatically calculates **deductions and contributions**.
   - Syncs benefit data with payroll for accurate salary processing.
   - Provides cost analysis for HR and finance teams.
4. **Compliance & Regulatory Support**
   - Ensures adherence to **labor laws, tax regulations, and insurance requirements**.
   - Generates compliance reports for audits.
   - Tracks changes in legislation and updates benefit policies accordingly.
5. **Communication & Notifications**
   - Sends reminders for **open enrollment deadlines**.
   - Provides updates on benefit changes or new offerings.
   - Offers personalized communication to employees about their benefit status.
6. **Analytics & Reporting**
   - Tracks benefit utilization and employee participation rates.
   - Provides insights into **costs, trends, and ROI** of benefit programs.
   - Helps HR design better benefit packages based on employee needs.
   -

7. **Employee Support & Transparency**

- Offers FAQs, helpdesk integration, and support channels.
- Provides clear visibility into benefit coverage, costs, and claims.
- Enhances employee satisfaction by simplifying benefit access.

Expense Management

1. **Expense Submission & Tracking**
   - Employees can submit expense claims (travel, meals, lodging, office supplies).
   - Supports uploading **receipts and invoices** digitally.
   - Provides real-time tracking of claim status (submitted → approved → reimbursed).
2. **Policy Enforcement & Validation**
   - Automatically checks claims against company **expense policies** (limits, categories, eligibility).
   - Flags non-compliant or duplicate claims.
   - Reduces manual errors and fraud.

Approval Workflows

- Configurable **multi-level approval chains** (manager → finance → HR).
- Supports role-based authorization.
- Provides notifications for pending approvals.

4. **Integration with Payroll & Finance**
   - Syncs approved expenses with payroll for reimbursement.
   - Integrates with accounting systems for accurate financial reporting.
   - Automates tax compliance and deductions.
5. **Analytics & Reporting**
   - Generates reports on expense trends, categories, and employee spending.
   - Provides insights into **budget utilization** and cost control.
   - Helps HR and finance teams identify high-spending areas.
6. **Mobile & Self-Service Access**
   - Employees can submit expenses via **mobile apps**.
   - Enables photo capture of receipts for quick uploads.
   - Provides self-service dashboards for employees to view claim history.
7. **Audit & Compliance**
   - Maintains audit trails of all expense submissions and approvals.

- Ensures compliance with **tax laws and corporate governance**.
- Facilitates external audits with detailed records.

Customization

User Interface Customization

- Modify dashboards, menus, and layouts to suit organizational preferences.
- Role-based views for HR, managers, and employees.
- Branding options (logo, color themes, company-specific terminology).

2. **Workflow & Process Configuration**

- Define custom workflows for recruitment, onboarding, performance reviews, and approvals.
- Automate multi-level approval chains based on organizational hierarchy.
- Adjust processes for different departments or regions.

3. **Policy & Rule Setup**

- Configure company-specific HR policies (leave rules, attendance, overtime, expense limits).
- Set eligibility criteria for benefits, promotions, or training programs.
- Adapt rules to comply with local labor laws and regulations.

4. **Forms & Data Fields**

- Create custom forms for employee data collection (onboarding, surveys, compliance).
- Add or remove fields to capture organization-specific information.
- Enable validation rules to ensure data accuracy.

5. **Reports & Analytics Customization**

- Build custom reports and dashboards for HR metrics.
- Define KPIs relevant to organizational goals (attrition, training hours, payroll costs).
- Schedule automated report generation and distribution.

6. **Integration Flexibility**

- Configure connections with payroll, ERP, CRM, or third-party applications.
- Customize APIs for seamless data exchange.
- Adapt integration settings for regional or departmental needs.

7. **Role-Based Access Control**

- Define custom roles and permissions.
- Restrict sensitive data visibility to authorized users.
- Enable granular access control for compliance and security.

Security

Access Control & Authentication

- Role-based access permissions (HR, managers, employees).
- Multi-factor authentication (MFA) for secure logins.
- Single Sign-On (SSO) integration for convenience and security.

2. **Data Encryption**

- Encrypts sensitive data both **at rest** (stored in databases) and **in transit** (during communication).
- Protects personal information such as salary, medical records, and identification numbers.

3. **Audit Trails & Monitoring**

- Tracks all user activities within the HRMS.
- Maintains logs for compliance and forensic analysis.
- Detects suspicious or unauthorized access attempts.

Compliance Management

- Ensures adherence to data protection regulations (GDPR, HIPAA, local labor laws).
- Provides automated compliance reports for audits.
- Supports data retention and deletion policies.

5. **Data Backup & Recovery**

- Regular backups of HR data to prevent loss.
- Disaster recovery mechanisms for business continuity.
- Secure restoration processes to maintain integrity.

6. **User Privacy Controls**

- Allows employees to manage visibility of their personal data.
- Provides consent management for data sharing.
- Ensures transparency in how employee data is used.

Threat Detection & Prevention

- Intrusion detection systems to identify cyber threats.
- Firewalls and anti-malware integration.
- Automated alerts for potential breaches.

Employee self-service portal

1. **Personal Information Management**
   - Employees can update personal details (address, phone number, emergency contacts).
   - View employment history, job role, and organizational details.
   - Manage document uploads (ID proofs, certifications).
2. **Leave & Attendance Management**
   - Apply for leave and track approval status.
   - View leave balances and holiday calendars.
   - Access attendance records and timesheets.
3. **Payroll & Compensation**
   - Download payslips and tax forms.
   - View salary structure, deductions, and benefits.
   - Submit reimbursement claims (travel, meals, office expenses).
4. **Benefits & Policy Access**
   - Enroll in health insurance, retirement plans, and wellness programs.
   - Access company policies, handbooks, and compliance documents.
   - Track benefit utilization and eligibility.
5. **Performance & Career Development**
   - Access performance reviews and feedback.
   - Set personal goals and track progress.
   - Register for training programs and skill development courses.
6. **Requests & Approvals**
   - Submit requests for IT assets, HR letters, or travel bookings.
   - Track approval workflows in real time.
   - Receive notifications on pending actions.
7. **Communication & Engagement**
   - Access company announcements and news.
   - Participate in surveys, polls, and feedback forms.
   - Connect with HR or managers through integrated messaging.

Document Management

Centralized Document Repository

- Stores all employee-related documents (contracts, ID proofs, certificates, performance reviews).
- Provides a single source of truth for HR and employees.
- Supports structured folders and metadata tagging.

2. **Secure Storage & Access Control**

- Role-based permissions to restrict document visibility.
- Encryption for sensitive files (salary slips, medical records).
- Audit trails to track who accessed or modified documents.

3. **Document Upload & Capture**

- Allows employees and HR to upload documents directly.
- Supports multiple formats (PDF, DOCX, images).
- Enables scanning and OCR (optical character recognition) for paper documents.

4. **Version Control & Updates**

 Maintains multiple versions of documents with timestamps.

- Tracks changes and ensures the latest version is accessible.
- Prevents duplication or outdated records.

5. **Compliance & Retention Policies**

- Automates retention schedules for legal compliance.
- Provides alerts for expiring documents (contracts, certifications).
- Generates compliance reports for audits.

6. **Search & Retrieval**

- Advanced search using keywords, tags, or employee IDs.
- Quick retrieval of documents during HR processes (onboarding, offboarding, promotions).
- Improves efficiency by reducing manual searches.

7. **Integration with Other HRMS Modules**

 Links documents to employee profiles, payroll, performance, and benefits.

- Ensures seamless access during onboarding, appraisals, or exit processes.

8. **Employee Self-Service Access**

- Employees can view and download their own documents (offer letters, payslips, tax forms).
- Provides transparency and reduces HR workload.

Payroll management

Salary Calculation & Processing

- Automates gross-to-net salary computation.
- Handles allowances, deductions, overtime, and bonuses.
- Supports multiple pay cycles (monthly, weekly, bi-weekly).

2. **Tax Management & Compliance**

- Calculates income tax, social security, and other statutory deductions.
- Generates tax forms and compliance reports (e.g., TDS, PF, ESI in India).
- Updates automatically with changes in tax laws.

3. **Integration with Attendance & Leave**

- Links payroll with attendance records and leave management.
- Adjusts salary based on absenteeism, late arrivals, or approved leave.
- Ensures accurate wage distribution tied to actual work hours.

Direct Deposit & Payment Distribution

- Supports direct bank transfers and electronic payments.
- Handles multiple payment modes (bank, cheque, digital wallets).
- Provides secure payment processing.

5. **Employee Self-Service Access**

- Employees can download payslips and view salary breakdowns.
- Access tax documents and reimbursement details.
- Transparency in payroll reduces HR queries.

6. **Reimbursements & Claims**

- Processes expense reimbursements alongside payroll.
- Integrates with expense management for seamless payouts.
- Tracks pending and approved claims.

7. **Analytics & Reporting**

 Generates payroll summaries, cost-to-company (CTC) reports, and trend analysis.

- Provides insights into labor costs and budget planning.
- Helps HR and finance teams with workforce cost optimization.

8. **Security & Audit Trails**

- Encrypts sensitive payroll data.
- Maintains audit logs for compliance and accountability.
- Ensures only authorized personnel access payroll records.

Employee database module

Performance Management
- Keeps appraisal records, performance ratings, and feedback.
- Tracks promotions, career progression, and succession planning.

Training & Development
- Stores training schedules, completion status, and certifications.
- Tracks employee skill development and learning paths.

Compliance & Legal Records
- Maintains statutory documents (contracts, ID proofs, tax forms).
- Tracks compliance with labor laws and organizational policies.

Employee Information Management
- Stores personal details (name, contact, address, demographics).
- Maintains employment history, job titles, and department assignments.
- Tracks skills, certifications, and qualifications.

Payroll & Compensation Data
- Records salary structures, allowances, deductions, and bonuses.
- Maintains tax-related information and compliance records.
- Supports integration with payroll processing systems.

Attendance & Leave Records
- Logs working hours, shifts, and overtime.
- Tracks leave balances, approvals, and usage.
- Integrates with biometric or attendance tracking systems.

Recruitment & Onboarding
- Stores candidate resumes, interview feedback, and hiring decisions.
- Maintains onboarding documents and training schedules.

Benefits & Welfare
- Records insurance, retirement plans, and other employee benefits.
- Tracks enrollment and claims history.

Security & Access Control
- Provides role-based access to sensitive HR data.
- Ensures data integrity, backup, and recovery mechanisms.

Analytics & Reporting
- Generates reports on workforce demographics, attrition, payroll, etc.
- Supports dashboards for HR decision-making.

Succession planning

Role Identification & Critical Position Mapping

- Defines key roles essential for organizational success.
- Maps positions that require succession planning (leadership, specialized skills).
- Prioritizes roles based on business impact and risk.

2. **Talent Pool Management**

- Identifies high-potential employees for future leadership.
- Creates talent pools for different departments or skill sets.
- Tracks readiness levels (ready now, ready soon, long-term potential).

3. **Competency & Skills Assessment**

- Evaluates employees against role-specific competencies.
- Uses performance reviews, 360-degree feedback, and skill a

 Highlights gaps between current skills and future role requirements.

4. **Career Pathing & Development Plans**

- Provides structured career progression paths.
- Assigns training, mentoring, and stretch assignments to prepare successors.
- Tracks development milestones and readiness progress.

5. **Scenario Planning & Risk Analysis**

- Simulates leadership gaps due to retirements, resignations, or promotions.
- Provides risk analysis for critical positions.
- Suggests contingency plans to mitigate talent shortages.

6. **Integration with Performance & Learning Modules**

- Links succession planning with performance management data.
- Integrates with learning and development for targeted upskilling.
- Ensures holistic employee growth aligned with organizational needs.

7. **Analytics & Reporting**

 Generates succession readiness reports for leadership.

- Provides dashboards on talent pipeline strength.
- Tracks diversity and inclusion in succession planning.

8. **Confidentiality & Security**

- Restricts access to sensitive succession data.
- Maintains audit trails for compliance.
- Ensures fairness and transparency in talent decisions.

Leave Management

Leave Request & Application

- Employees can apply for different types of leave (annual, sick, casual, maternity, etc.).
- Self-service portal for submitting requests online.
- Option to attach supporting documents (medical certificates, etc.).

2. **Approval Workflow**

- Configurable multi-level approval chains (manager → HR → higher authority).
- Notifications and alerts for pending approvals.
- Role-based authorization to ensure proper oversight.

3. **Leave Balance Tracking**

- Real-time visibility of leave balances for employees.
- Automatic accrual of leave based on company policies.

 Carry-forward and encashment options.

4. **Policy Enforcement**

- Enforces company-specific leave rules (eligibility, limits, blackout dates).
- Prevents overlapping or excessive leave requests.
- Ensures compliance with labor laws and regulations.

5. **Integration with Attendance & Payroll**

- Syncs leave data with attendance records for accurate tracking.
- Adjusts payroll based on unpaid or excess leave.
- Provides seamless link to overtime and shift scheduling.

6. **Analytics & Reporting**

- Generates reports on leave usage, absenteeism trends, and department-wise leave patterns.
- Helps HR forecast workforce availability.

 Provides insights into productivity impact due to leave.

7. **Employee Self-Service Access**
    - Employees can view leave balances, holiday calendars, and past leave history.
    - Transparency reduces HR queries.
    - Mobile access for applying and tracking leave on the go.
8. **Compliance & Audit Trails**
    - Maintains records of all leave applications and approvals.
    - Ensures compliance with statutory requirements (e.g., maternity leave laws).
    - Provides audit logs for accountability.

Recruitment Management

Job Requisition & Posting

- Create and approve job requisitions.
- Publish openings on career portals, job boards, and social media.
- Manage internal job postings for employee referrals.

2. **Applicant Tracking System (ATS)**

- Centralized database of applicants.
- Tracks candidate progress through stages (application → screening → interview → offer).
- Provides search and filtering options for resumes.

3. **Resume & Application Management**

- Automated resume parsing to extract candidate details.
- Supports multiple formats (PDF, DOCX).
- Stores candidate profiles for future openings (talent pool).

4. **Screening & Shortlisting**

- Configurable screening criteria (skills, experience, qualifications).
- Automated ranking and scoring of candidates.
- Integration with assessment tools for tests and evaluations.

5. **Interview Scheduling & Management**

- Calendar integration for interview scheduling.
- Automated notifications to candidates and interviewers.
- Collects interviewer feedback in a structured format.

6. **Offer Management**

- Generates offer letters with customizable templates.
- Tracks offer acceptance or rejection.
- Integrates with onboarding workflows.

7. **Analytics & Reporting**

- Recruitment metrics (time-to-hire, cost-per-hire, source effectiveness).
- Diversity and inclusion reporting.
- Pipeline visibility for HR and leadership.

8. **Compliance & Data Security**

- Ensures adherence to labor laws and equal opportunity regulations.
- Maintains audit trails of recruitment decisions.
- Protects candidate data with secure access controls.

9. **Candidate Experience**

- Self-service portals for application tracking.
- Automated communication (acknowledgements, updates).
- Enhances employer branding through smooth recruitment processes.

HR Analytics and Reporting

Workforce Analytics

- Tracks headcount, demographics, and workforce distribution.
- Monitors attrition, retention, and employee turnover rates.
- Provides insights into workforce diversity and inclusion.

2. **Performance & Productivity Analysis**

- Evaluates employee performance trends across departments.
- Links performance data with training, promotions, and compensation.
- Identifies high performers and skill gaps.

3. **Recruitment & Talent Acquisition Metrics**

- Measures time-to-hire, cost-per-hire, and source effectiveness.
- Tracks candidate pipeline and recruitment funnel efficiency.
- Provides insights into hiring quality and onboarding success.

Compensation & Payroll Analytics

- Analyzes salary distribution, pay equity, and benefits utilization.
- Tracks payroll costs by department, role, or location.
- Supports compliance with compensation regulations.

5. **Learning & Development Insights**

- Monitors training participation and completion rates.
- Evaluates impact of learning programs on performance.
- Identifies skill development needs for succession planning.

6. **Leave & Attendance Reporting**

- Tracks absenteeism, leave utilization, and overtime trends.
- Provides insights into productivity impact due to time-off.
- Helps forecast workforce availability.

7. **Predictive Analytics**

 Uses historical data to forecast attrition, hiring needs, and workforce trends.

- Identifies potential risks in talent pipelines.
- Supports strategic workforce planning.

8. **Customizable Dashboards & Reports**
    - Role-based dashboards for HR, managers, and executives.
    - Custom report generation (monthly, quarterly, annual).
    - Exportable reports for audits and compliance.
9. **Compliance & Audit Support**
    - Generates reports for labor law compliance.
    - Maintains audit trails of HR decisions.
    - Ensures transparency in workforce management.

Multi-country support

Localization of HR Policies

- Configures country-specific HR policies (leave rules, working hours, overtime).
- Adapts to local labor laws and statutory requirements.
- Supports multiple employment types (full-time, contract, part-time).

2. **Multi-Currency & Payroll Support**

- Handles payroll in different currencies.
- Applies local tax rules, social security contributions, and deductions.
- Provides consolidated global payroll reporting.

3. **Language & Regional Settings**

- Offers multi-language interfaces for employees and HR teams.
- Supports local date formats, calendars, and cultural preferences.
- Enhances employee experience by adapting to regional norms.

Compliance & Legal Adherence

- Tracks country-specific compliance requirements (GDPR in EU, PF/ESI in India, HIPAA in US healthcare).
- Generates compliance reports for audits in each jurisdiction.
- Automates updates when local laws change.

5. **Global Workforce Analytics**

- Provides consolidated dashboards for global HR metrics.
- Allows drill-down into country-specific data.
- Helps leadership compare workforce trends across regions.

6. **Benefits & Compensation Management**

- Configures benefits packages based on local eligibility rules.
- Ensures fair compensation aligned with regional standards.
- Tracks global equity in pay and benefits.

7. **Cross-Border Mobility & Transfers**

- Manages expatriate assignments and international transfers.
- Tracks relocation benefits, visa documentation, and compliance.
- Supports global career pathing and succession planning.

8. **Centralized & Decentralized Control**

- Provides global HR teams with centralized oversight.
- Allows local HR managers to customize processes for their region.
- Balances global consistency with local flexibility.

Performance Management

Goal Setting & Alignment

- Define individual, team, and organizational goals.
- Align employee objectives with company strategy.
- Track progress toward targets in real time.

2. Performance Reviews & Appraisals

- Configurable review cycles (quarterly, annual, project-based).
- Supports 360-degree feedback (peers, managers, subordinates).
- Automates appraisal forms and rating scales.

3. Continuous Feedback

- Enables managers and peers to provide ongoing feedback.
- Encourages recognition and constructive criticism.
- Improves employee engagement and motivation.

Competency & Skill Assessment

- Evaluates employees against role-specific competencies.
- Identifies skill gaps for training and development.
- Links assessments to career progression.

5. **Performance Analytics & Reporting**

- Generates dashboards for performance trends.
- Provides insights into high performers and underperformers.
- Supports data-driven decisions for promotions, rewards, or interventions.

6. **Integration with Learning & Development**

- Connects performance outcomes with training programs.
- Suggests personalized learning paths based on gaps.
- Tracks impact of training on performance improvement.

Reward & Recognition Management

- Links performance ratings to compensation, bonuses, and incentives.
- Automates reward distribution based on appraisal outcomes.
- Encourages merit-based recognition.

8. **Succession & Career Planning**
    - Identifies employees ready for leadership roles.
    - Supports career pathing based on performance history.
    - Integrates with succession planning for critical positions.
9. **Compliance & Transparency**
    - Ensures fair and unbiased evaluations.
    - Maintains audit trails of performance reviews.
    - Provides employees visibility into their ratings and feedback.

Audit and Security

Access Control & Authentication

- Role-based access permissions for HR, managers, and employees.
- Multi-factor authentication (MFA) and Single Sign-On (SSO).
- Granular control over who can view, edit, or approve HR data.

2. **Data Encryption & Protection**

- Encrypts sensitive information both at rest and in transit.
- Protects payroll, medical, and personal records.
- Ensures secure storage and transmission of documents.

3. **Audit Trails & Activity Logs**

- Tracks all user actions within the HRMS.
- Maintains logs of login attempts, data changes, and approvals.
- Provides forensic evidence for investigations.

Compliance Management

- Ensures adherence to data protection laws (GDPR, HIPAA, local labor regulations).
- Generates compliance reports for audits.
- Automates retention and deletion policies.

5. **Monitoring & Alerts**

- Real-time monitoring of suspicious activities.
- Automated alerts for unauthorized access attempts.
- Intrusion detection and prevention mechanisms.

6. **Data Backup & Recovery**

- Scheduled backups of HR data.
- Disaster recovery protocols for business continuity.
- Secure restoration processes to maintain integrity.

User Privacy & Consent Management

- Employees can manage visibility of their personal data.
- Consent tracking for data usage and sharing.
- Transparency in how employee information is handled.

8. **Reporting & Analytics**

- Security dashboards for HR and IT teams.
- Reports on access violations, compliance status, and audit findings.
- Helps leadership assess risk and security posture.
